Push & Go
retractable glass balustrade

Push & Go is a retractable glass balustrade system, designed to protect outdoor areas from strong wind and rain.

One Push!!

This is just what it takes... One push and the glass is retracted up to a height of 185cm, offering protection both for commercial or residential spaces.

Do you have a parasol or maybe an arm awning and you want an unobstructed view?!! **Push & Go** is the right product for you.

Do it with CLASS!!!!

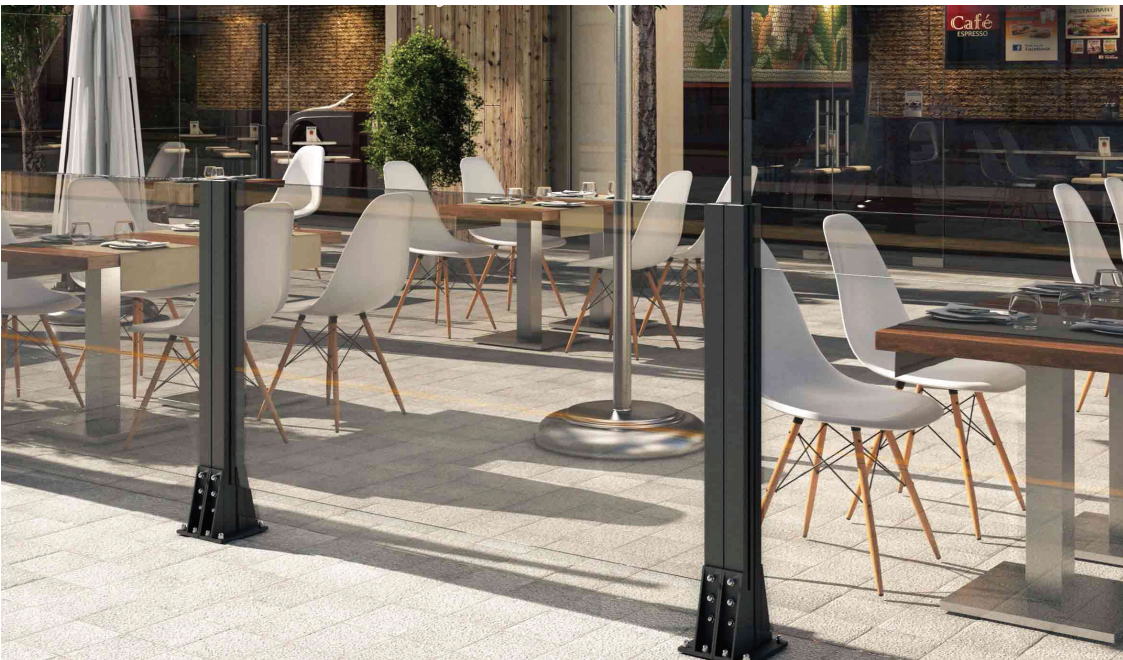

Upgrade your outdoor area, get rid of the old outdated windbreakers and make the difference.

Push & Go is an affordable high-end product that transforms spaces to place of enjoyment, relaxation and pleasure.

Enjoy a clean, unobstructed view!!!

Push & Go is a made - to - measure retractable glass balustrade. With a maximum height of 185cm and a width of 180cm, can easily retract due to the two strong gas pistons that are integrated inside the pillar profile.

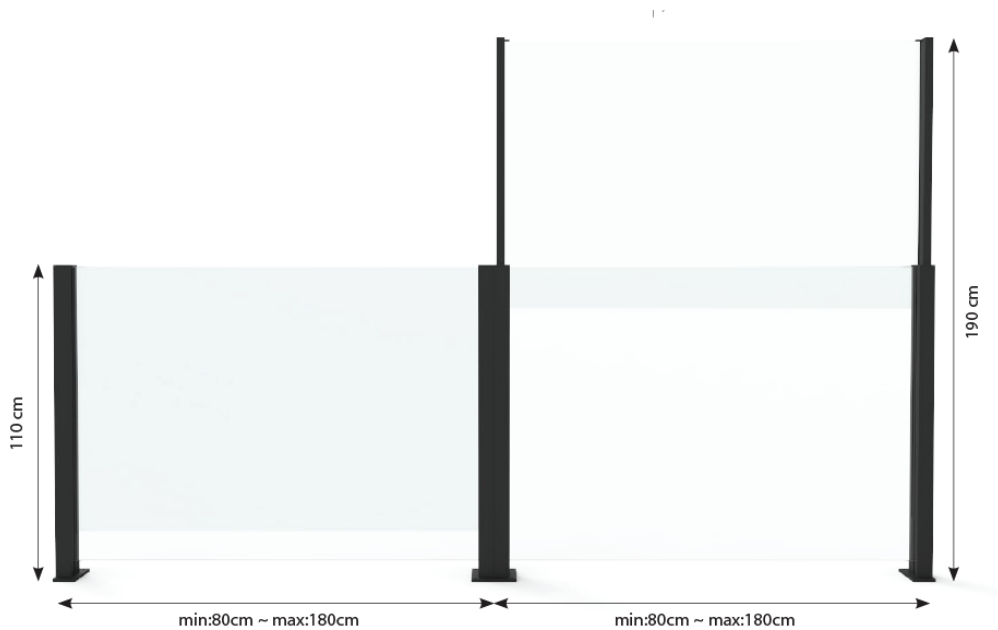

Pushing down the movable glass, the system is unlocked and lifts up automatically without any effort.

To maximize safety, a 4+4 laminate glass panel is used for both fixed and moving part of the system, achieving this way also maximum stability.

WHEELED BASE (Optional)

Industrial wheels with brakes, for areas where fastening on the ground is not possible.

Windbreakers with wheeled based should not be used to protect outdoor areas with strong winds. The stability of the system is affected, and the modules should be used with caution.

INTEGRATED FLOWER BOX (Optional)

Push & Go modules can also support a galvanized and powder coated base that can be used as a flower box.

This way we can ensure the stability of the windbreaker without fastening it on the ground.
